WORK EXPERIENCE

Software Engineer 2

Jul 2025 – Present

Ticketmaster

Remote

- Delivered frontend features for high-trac sports and ticketing products serving 100K+ users using **React** and **Next.js**, collaborating with product managers and designers to ship features iteratively across distributed systems with **multi-region deployments**.
- Migrated data-heavy XSLT pages to Next.js 13 App Router with **SSR, ISR, and Edge caching**, achieving 20% reduction in page load time and measurable **LCP improvement** across all migrated routes.
- Developed core modules for a large-scale ops backcoce including a rule-based feature toggle system, multi-locale label management, and event/seat CRUD workflows backed by **PostgreSQL and REST APIs**.
- Built and consumed backend REST APIs using Node.js, integrating with Azure Data Factory pipelines and Microsoft Azure cloud services for data orchestration across the back-office platform.
- Debugged production issues and improved application performance and service reliability. Applied TDD using **Jest and React Testing Library** within an **Agile cycle**, maintaining regression safety throughout the migration.
- Worked within a containerized environment using **Docker and GitLab CI/CD**, contributing to deployment pipelines and ensuring reliable builds across environments.

Frontend Engineer

Apr 2023 – Jul 2025

Factacy.ai

Gurugram

- Built Factacy Insights, a real-time data visualization platform using **React.js and GraphQL** serving 5,000+ users. Introduced GraphQL to replace REST APIs, eliminating over-fetching by aligning query structure to the databases relational model.
- Implemented **database indexing** across key filter fields including brand name, legal company name, company CIN, and company sector, making complex multi-filter queries near-instant at scale.
- Developed AG Grid powered tools with editable cells and dynamic date grouping, reducing **planning time by 30%**
- Built and integrated a Node.js backend with Razorpay Payment Gateway, applying **debouncing and timeout logic** to reduce server load.
- Built an AI chatbot for Digitek using React.js and TailwindCSS, integrated into their **Shopify** storefront via custom JavaScript to handle customer queries directly on the site.
- Actively used **GitHub Copilot and Claude AI** to improve code quality, accelerate delivery, and automate repetitive development tasks.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS, C++

Frontend: React.js, Next.js, Angular, React Native, Redux, TailwindCSS, Bootstrap, Jest, React Testing Library

Backend and Databases: Node.js, MongoDB, GraphQL, DBeaver, Azure Data Factory, Supabase

Tools and Platforms: Git, GitHub, GitLab CI/CD, Docker, Lighthouse CI, Firebase, Razorpay, Stripe

AI & Other: Data Structures and Algorithms, Claude AI, GitHub Copilot, LLMs, Generative AI, Prompt Engineering

PROJECTS

Hand Gesture Recognition

- Developed a WebRTC-based app using **React.js, MediaPipe, and OpenCV** that streams real-time video to a backend model for hand gesture recognition. The app evaluates user performance based on correct gesture sequences with **video latency** kept under **250ms** for a smooth browser experience.
- Tech: React.js, MediaPipe, OpenCV, WebRTC, Python

BidFinite

- Built a real-time gamified auction platform for an automotive client, supporting public auctions with thousands of **concurrent users** and private room-based auctions with simultaneous multi-vehicle bidding and live chat. Architected a **WebSocket layer** for millisecond-precision bid synchronisation, **high-frequency** event handling, and accurate reward pool distribution under load.
- Tech: React.js, TailwindCSS, WebSockets, RestAPI, Node.js

HONORS & CERTIFICATIONS

Google Cloud Engineering Track

- Google Cloud Engineering track and Data Science and Machine Learning Track in 30 days of Google Cloud Program.
- Skills : Google Cloud Platform (GCP), Kubernetes Engine, Cloud Services

NSQF Software Developer

- Software Developer (QP No. -SSC/Q0508) conforming to National Skill Qualifications Framework Level 4

EDUCATION

University of Delhi

Mar 2020 – Apr 2023

Bachelor's in Computer Science

New Delhi

- **Coursework:** Data Structures and Algorithms, Object-Oriented Programming, System Design, Database Systems, Statistics, Management Information Systems, Systems and Networks.
